SRS Provides Radiation Survey Equipment to Aiken Technical College

AIKEN, S.C. (March 3, 2009) – Savannah River Nuclear Solutions, LLC (SRNS) employees recently delivered a truckload of excess radiation survey equipment to Aiken Technical College (ATC).

The loaned equipment was unloaded at ATC on Thursday, Feb. 26, and will be used by Aiken Tech's RADCON Laboratory personnel to train radiation protection technicians for careers within the nuclear industry.

"SRS has enjoyed a long history of working with and assisting ATC in their efforts to continually improve the educational programs offered to area students," said Chuck Munns, SRNS President and CEO. "This has been a 'win-win' arrangement that has benefited our company as well with the increase of qualified job candidates to assist us with our missions."

Specifically, the 43 instruments loaned to ATC consist primarily of contamination and direct reading radiation survey meters.

SRS is owned by the U.S. Department of Energy and the management and operating contractor is Savannah River Nuclear Solutions, LLC.
